

Navy Civil Engineer Corps Officer

Navy Civil Engineer Corps (CEC) Officers are the Navy's facilities experts in charge of engineering, management, planning, construction and maintenance of the Navy's shore infrastructure. Every year, Navy CEC Officers manage more than \$12 billion worth of design, construction, and service contracts. As a CEC Officer, you will operate and maintain complex facilities and utilities systems at shore activities while managing the efforts of a large and diverse civilian and military workforce. From the very beginning you will supervise construction, identify problems, devise solutions, and ultimately obtain engineering management experience, responsibility and authority far exceeding that offered in the private sector.

There are hundreds of Navy/Marine Corps shore facilities worldwide each operating like a small city. There are hospitals, airfields, power plants, housing, stores, office buildings and much more requiring the technical and contractual expertise of the Navy CEC Officer.

As a CEC Officer you will fill a multitude of diverse roles; however, the primary focus throughout your careers is in facilities construction / management and expeditionary engineering.

CIVIL ENGINEER COLLEGIATE PROGRAM

You may apply for the Civil Engineer Collegiate Program while in undergraduate or even graduate school. This is not NROTC! No uniforms. No drills. No military classes until after you graduate. Get paid while attending college, up to 24 months.

	E-3
Base Pay (2014)	\$1,885.80
-Housing (w/o Dependents)*	\$2,406
-Subsistence Pay	\$366.29
-Total Pay (While in School)	\$4,660.09

Note: E-4/5 can be obtained by referring an individual who enters the program.

*This is based on pay, housing allowance and food allowance. The housing allowance varies according to location of the school. You also receive all the benefits enjoyed by regular Navy personnel. These include 30-days vacation with pay earned each year, medical and dental care, tax-free shopping at on base locations, use of Navy recreation facilities and much more.
