I am a Student - How do I change my name or other personal information on my New York Tech Profile?

To change your name or any other personal information on your New York Tech Profile, simply complete the Office of the Registrar [Application to Change Personal Information](#) Form and submit the completed Form to the Office of the Registrar.

Once your name or other personal information in the New York Tech Student Information System is updated as you requested, please contact Service Central @ servicecentral@nyit.edu to advise them of the updates so other IT systems (like e-mail) can be updated to reflect the changes.
